

VITAVET BIOZYME - 1KG

INDICATIONS:

VITAVET Bio-Zyme Supplement is specially formulated for broilers, camels, sheep, goats, and cattle. It is designed to support digestive health, and enhance nutrient absorption.

Benefits: Improves Gut Health: A balanced blend of beneficial bacteria helps to maintain a healthy gut microbiome, reducing the risk of gastrointestinal issues. **Enhances Digestion:** A combination of powerful enzymes aids in the breakdown of complex feed components, enhancing digestibility and nutrient availability. **Boosts Immunity:** Probiotics support the immune system, helping animals to resist infections and stay healthy. **Increases Feed Efficiency:** Improved digestion and nutrient absorption lead to better feed conversion ratios, supporting growth and productivity.

DESCRIPTION:

VITAVET Bio-Zyme Supplement is a formulated blend designed to enhance the digestive health of broilers, camels, sheep, goats, and cattle. This supplement combines a diverse array of beneficial probiotics and potent enzymes to optimize digestion, nutrient absorption, and immune function. Probiotics: This supplement includes a robust mix of beneficial bacteria from different genera, including Lactobacillus, Bifidobacterium, Bacillus, and Streptococcus. These probiotics help maintain a balanced gut microbiota, inhibit the growth of pathogenic bacteria, and support the animal's natural defenses. Enzymes: Our formula incorporates essential digestive enzymes such as cellulase, xylanase, beta-glucanase, alpha-amylase, and protease. These enzymes aid in breaking down complex carbohydrates, proteins, and fats, making nutrients more bioavailable for absorption and promoting efficient digestion.

COMPOSITION :

Probiotic: More Than 10 *10 CFU/gm
Lactic Acid Bacteria: Lactobacillus plantarum, Lactobacillus delbrueckii subsp. bulgaricus, Lactobacillus acidophilus, Lactobacillus rhamnosus, Streptococcus thermophilus, Enterococcus faecium.
Bifidobacteria:
 Bifidobacterium bifidum.
Bacilli:
 Bacillus licheniformis, Bacillus coagulans, Bacillus subtilis.
Enzyme: More Than 100 Unites / gm Cellulase ,Xylanase, Beta-glucanase ,Alpha-amylase, Protease.

PROBIOTIC, ENZYME FOR ANIMAL GUT HEALTH FOR ORAL ADMINISTRATION

DOSAGE AND ADMINISTRATION:

Dosing is presented as follow:
Poultry: Chicks: 150gm/tonne in feed or 1gm/litre of water for the first 5-7 days.
 Growers: 100gm/tonne in feed or 1gm/ 2litres of water.
 Finishers, Breeders & Layers : 50gm/tonne in feed or 1 gm 4 litres of water.
Sheep & Goats: All age: 50gm/tonne in feed or 0.25gm/ animal/day.
Camels and Cattle: Small: 75gm/tonne in feed or 0.25gm animal/day.
Dairy/Beef: 50gm/tonne in feed or 0.25gm/animal/day.
 Dissolved in water, before use.

Keep it in the original packing below 25°C

USED FOR

Camel, Cattle, Sheep, goats, poultry
